- 1) Turn on the Video Camera using the power button on the camera **Remote Control**.

**NOTE: Camera will take 30 seconds to power on and initialize.**

- 2) Camera will rotate and focus on a default view of the entire room. A single blue power light indicates the camera is on and ready.

When the Camera is turned **off** it will go into standby (green light and blue light are both on)

- 3) The camera view angle and zoom can be adjusted from the remote using the arrow and zoom buttons.
- 4) Audio is through a ceiling mounted real-time steering array microphone. There is no need to adjust or power on the unit it will automatically function as the default microphone source for any web conference software (Skype, Zoom, etc.) used from the PC.

Use the arrow keys to aim the web camera

**ON**

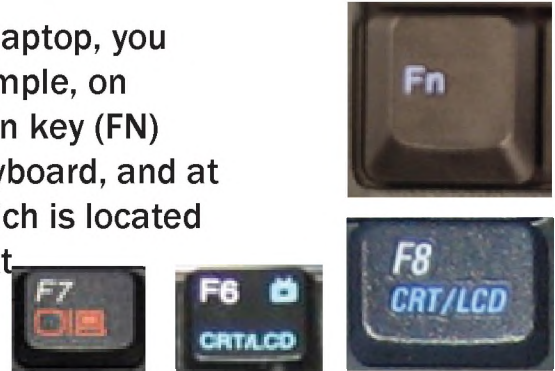

**2**

**OFF/STANDBY**

## Laptop Troubleshooting

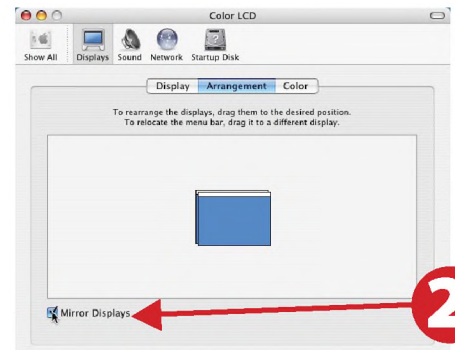

For PC Laptops: Depending on your model of laptop, you may need to toggle the display mode. For example, on many laptops, you must hold down the function key (FN) located in the lower left-hand corner of the keyboard, and at the same time, press the video toggle key, which is located along the top of the keyboard. Look for the text CRT/LCD or an icon of a display and a laptop.

Examples of video toggle keys

For Mac Laptops:

- 1) Go to System Preferences/Display.
- 2) Select the Arrangement tab and check the Mirror Displays box.

## Powering Down the System

- 1) Point the Epson remote at the projector on the ceiling. Press the power button to shut down the projector.
- 2) Power down Computer  
Windows:  
Start Menu -> Shut Down -> Click OK
- 3) Raise screen
